

G. CLARK GABLE VON FRITZ'S HEALTH RESULTS

We have tested G. Clark Gable Von Fritz's DNA for more than 150 disease-causing mutations. Below is a summary of our findings.

!

AT RISK - 0

Being "At Risk" means G. Clark Gable Von Fritz may show or develop signs of one of the following genetic diseases. Please be sure to read the condition information carefully and share these results with your veterinarian.

!

CARRIER -

1

Carrier status is where a dog has inherited one copy of a disease-causing mutation, when two copies are usually needed for disease signs to occur. The good news is that carriers are unlikely to show disease signs, but there may be a slight increase in risk of disease for some conditions. Please be sure to read the condition information carefully and share these results with your veterinarian.

Degenerative Myelopathy

CLEAR - 151

G. Clark Gable Von Fritz inherited zero copies of these disease mutations. Be sure to use our share feature to let your veterinarian know about G. Clark Gable Von Fritz's results. For some of the conditions there may still be undiscovered mutations and/or environmental factors that could lead to similar disease signs. These clear results will help narrow down a future diagnosis if G. Clark Gable Von Fritz ever gets sick.
